

Fischer Nylon "Frame Anchors"

The Perfect Door Frame Anchor!

Trouble-Free Installation

Anchor Won't Spin in Hole

Flush with frame
EVERY TIME!

Tremendous Labor Savings

Totally Removable

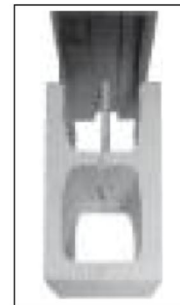

Sizes for Every Application

Fischer Frame Anchors are excellent substitutes for many Tapcon[®], sleeve, and wedge anchor applications. They will not "spin" in the hole when tightened like many sleeve anchors do; they do not strip out or snap, as Tapcons often do; and they offer more flexibility in length selections. Their holding power exceeds that of a Tapcon and is comparable to the holding power of a sleeve anchor. Fischer Frame Anchors are far and away the best door frame anchor available. Fischer Frame Anchors can be installed quickly using a cordless drill, screwgun, or conventional hand screwdriver. Lower your installation time by as 50%.

Application Examples:

- Door Bucks
- Window Frames
- Furring
- Timber Plates

Type	Article Nr.	Drill Diameter	Minimum Embedment Depth	Anchor Length	Box Qty
SXR 10 x 80	46263	3/8	2	3 1/8	50
